Orchestra

now

auto-assigned "Refund flow API" → Alakh

Dependency t-intents is now merged — unblocked. Alakh owns the payments surface.

Mitaali

1m

merged PR #219 · Order summary component

Itemized totals, tax + promo line, a11y pass.

Mitaali

2m

pushed 2 commits · opened PR #221

Apple Pay sheet wired to /intents; ready for review.

Naman

3m

approved PR #214 · Payment Intents endpoint

LGTM — idempotency keys handled correctly.

Devansh

4m

CI passed on ui/express-pay.tsx

24 checks green · build 4m12s.

Riya

5m

updated frames in Checkout v3 (+3 screens)

Express-pay row + trust badges added above the fold.

Blueprint Generator

Describe your app in plain words. Orchestra acts as a technical architect — it breaks the idea into sequenced tasks, wires up dependencies, and assigns each to the right person.

YOUR APP IDEA

A checkout & payments platform: customers can pay by card or Apple Pay, save cards for later, and request refunds. Needs a dashboard for merchants to see transactions.

Generate blueprint

New task

Team & Workload

Orchestra reads each person's past activity to learn their strengths, then balances new work so nobody becomes a bottleneck.

Rebalance suggestion. Alakh is at 88% on the payments surface. Move **Fraud rules engine** to Naman (35%) to keep the cycle flowing.
